Resilience is a game that you might have heard about it but not sure of the details. The story-line is all about the giant wars that were sparked and, in the end, the collapse of civilization. The first thing to notice about the game, however, is that the conflict was between two different superpowers that have been going around the world engaging in wars. You and the other survivors are fighting to establish a new society. The game consists of six parts and the story consists of about 75 hours of gameplay. The online play provided in the game is completely free and runs on an asynchronous multiplayer model. You can come together with your friends and use fire and different weapons to destroy each other online. You can also enjoy single-player campaigns, in addition to the online experience. While playing the game, you will be able to unlock various characters to use in the game. You can buy these characters for a price of 10 euros. The game is available on the App Store, Google Play, and Ith.io. Key Features : - Play offline on your mobile device (requires Android 4.0 or later) - Destroy your enemy from two different positions - Includes single player mode - 5 different characters to select - 30 levels to challenge yourself - 2 different game modes (storyline and survival) - 70 hours of story mode - Graphical effects and animations - Works without Wifi connection Resilience is developed by Skatt Games Ltd. Skatt Games is a game studio that was originally founded by David and Steve Gibson in the United Kingdom. David worked as a game designer with companies such as Codemasters and Codename Entertainment. When David and Steve decided to start their own company, they chose to incorporate Peter and Carlos Tallent into their team. This is because they were the ones who had previously worked on the popular game "Civilization V." They have also worked on games such as "Gothic 4" and "World End Economica" (WWE).
