Smart Menu is a straightforward piece of software that enables users to design menus for restaurants, pubs, coffee bars, or other business establishment. It sports a clean and intuitive layout that allows you to set up the dedicated parameters with minimum effort. Smart Menu gives you the possibility to select from a wide range of preset menu items or add custom items into the menu. When it comes to menu style customization options, you are allowed to set up the margin parameters (e.g. top, right, left), and

select between a single or folded sheet. Additionally, you can pick the column and line distance, show background image, ingredients, price, photo, and total price, tweak the description and ingredients in terms of font, font style, and size, as well as insert data about calories. What's more, the program lets you choose between different background templates, add new categories and subcategories, preview the menus and zoom in or out, view details about each food item, and add a new one to the list by specifying the category, short and long description, ingredients,

price, calories, and photo. Other notable characteristics worth mentioning are represented by the possibility to attach a background photo from the computer (JPG, BMP, GIF), amd build random menus based on user-defined parameters, such as total calories, price, or other criteria. During our testing we have noticed that Smart Menu carries out a task very quickly and without errors throughout the entire process. It eats up CPU and memory, so the overall performance of the computer may be affected. As a conclusion, Smart Menu proves to be a reliable application

that features a handy set of parameters and an intuitive interface for helping create high-quality menus. "Settle a bet on a soccer match today!
