Do not use Photoshop with a non-Macintosh computer. macOS does not make a functioning installation of Photoshop available in the Microsoft Windows environment. Instead, use another image editing package, such as the free GIMP (or the Adobe CS3 or CS5 version of Photoshop Elements, Adobe Photo Deluxe, the free version of Adobe Photoshop Lightroom

(www.adobe.com), or the free Sony Vegas Suite software (www.microsoft.com/windows/products/v-series/vegas.aspx). The user interface Each Photoshop document starts with a new canvas on which the user constructs a new document. The UI consists of several areas in which a user works. The software works with several types of images and multiple layers. These include the following: Background layer: This is generally the working layer in which the design and text is built. Layers: This is the area where Photoshop constructs the drawing. It can contain the new image or any of the elements from the previous layer. Pens: This is the area where a user can work with multiple layers on a single canvas, either in different pens or together on a single layer. Multiple drawings and drawings with different images may be referenced in a single layer. Select: This allows the user to select a region of a layer using image-editing tools. It's here that a user can work with the existing contents of a layer. You use the Process tool to create a new layer, the Select tool to select an area of an existing layer, and the Brush tool to modify areas of a layer. As you work with a document, you use the workspace to select different tools to apply various edits. Figure 6-1 shows some of the tools on a single layer. The workspace Every tool of a Photoshop document is accessible on its top-left corner.

Some tools, such as the Selection tool, the Colorize tools, and the Drop Shadow tool, are always in the same location, as shown in Figure 6-1. Other tools are not always at the top-left corner of the workspace, as these appear below the top-left corner tool in the workspace. Here's the workspace with different tools: In each subtable, the top-left corner is the tool in the table. Applying and editing layer styles Every layer has a layer style. It's that very special set of

Q: Apply convergence test to a fractional series Let $x \in \mathbb{R}$ and let $\frac{1}{2} < x < 1$. How do I calculate the partial sum? A:
$$\lim_{n \rightarrow \infty} \left(\sum_{k=1}^n (k^{2s} - k^{1-s}) \right)^{\frac{1}{2s-1}} = \lim_{n \rightarrow \infty} \left(\frac{n^{2s} - n^{1-s}}{\frac{1}{2s-1} - \frac{1}{n^{1-s}}} \right)^{\frac{1}{2s-1}}$$
$$= \lim_{n \rightarrow \infty} \left(1 - \frac{1-s}{n^{1-s}} + \frac{s}{n^{1-s}} \right)^{\frac{1}{2s-1}} = \lim_{n \rightarrow \infty} e^{\left(1-s - \frac{s}{n^{1-s}} \right) \frac{1}{2s-1}}$$
$$= e^{\frac{(1-s)(s)}{2s-1}} = e^{\frac{s(1-s)}{2s-1}}$$
