Network Administrator Crack+ Free License Key [Mac/Win]

Network Administrator Cracked Version is a simple yet powerful application designed to manage the network resources. It allows you to view all the network users (family, friends, employees, clients) and their details. Additionally, it can be used to track each of the user's access to the network resources. View all your network users NetAdmin shows all your network users, allowing you to see their phone numbers, e-mail addresses, or any other details you'd like to check. Create new contacts Use this screen to add new contacts and assign them with a particular task. For example, you can add contacts, include their phone number and e-mail address, and assign them the task to view their details. Manage network users' access This feature lets you control all the users' access to a specific resource, such as restricted printers or the internet. Using this, you can block any contact from accessing any of the network resources. Additionally, you can view each of the resource's access by users. Export users to XLS or HTML Using this feature, you can export all your network users to XLS, HTML, TXT or XML files. Plus, you can filter each list by a certain criterion such as a contact's name, phone number, e-mail address, or role. Create backups at a specified time interval In order to make a backup of your database, you can specify a specific time interval (daily, weekly, monthly). It's also possible to export the backup file to XML or HTML. Features: * View all your network users * Create new contacts * Manage network users' access * Export users to XLS, HTML, TXT or XML * Backup at a specified time interval * Show only contacts' information * Export users to XLS, HTML, TXT or XML Help and Support: The developers provide 24x7 support via email.
